

## POLYMORE micro 0,5

is a complete dissolving- and dosage equipment for liquid, concentrated polymer in emulsion- or dispersion form.

The equipment is complete, including a multi-zone mixing chamber with a built in agitator. The machine is delivered with a system for solvent water including strainer valve, solenoid valve, constant flow valve, a flow switch and a control cabinet. The peristaltic pump for the concentrated polymer is mounted in a separate cabinet.

## POLYMORE micro 0,5

is designed for a maximum capacity of **0,12 litres** concentrated polymer (product as supplied) per hour with a maximum flow of **30 litres** water
